

CURRICULUM VITAE

As a Full Stack Developer, I recently completed a comprehensive coding traineeship, successfully delivering two real-world projects to exact specifications. I am an enthusiastic individual eager to gain experience and advance within a company. Calm-natured and possessing excellent teamwork skills, I am always looking out for my colleagues. I have strong analytical abilities, enabling me to find solutions to unexpected challenges. Organised and committed to ongoing training and development, I look forward to establishing a career in the development field where I can prove my value as an asset.

CODING TRAINEESHIP

IT Career Switch Ltd

Coding Traineeship – Full stack developer (1-year program)
During the traineeship I had to demonstrate a very competent level of the following programming languages and technical skills

- HTML5, CSS3, JavaScript
- PHP, SQL, React, jQuery
- Python, Node.js, Bootstrap
- Command line Git, Github
- Remote API access

ADDITIONAL TECHNOLOGIES:

- TypeScript, Laravel, Vue.js, Bash, Redux, Express, PostgreSQL, JIRA, Visual Studio Code, AWS, Kubernetes, Docker, JumpCloud

METHODOLOGIES:

- Agile, Test Driven Development

DEVELOPMENT EXPERIENCE:

Below are the two briefs of development projects I completed with IT Career Switch which can be found in my bio: <http://www.binyominfreedman.co.uk/>

Portfolio Project #1: “Gazetteer”

The specification was to reply to a website specification for a map-based app to provide information on countries, with a focus on a “mobile-first” development. Preferably using a framework, to then develop HTML, CSS and JavaScript with JQuery modules that use PHP server-based components to source data from third-party APIs (Geonames, OpenWeather). The solution is assessed on its delivery to specification, functionality, and usability.

Portfolio Project #2: “Company Directory”

A more rigorous reply to this specification was required as a user requirements document was needed to be prepared which, when signed off, triggers the release of SQL allowing to develop a “mobile-first” application to maintain a company personnel database (MySQL). Sign off is only achieved upon the student supplying an independently witnessed document providing confirmation of the system’s ability to perform error-free.

CAREER HISTORY:

Aug 2020 – Apr 2023

Fixtuur (Previously DigitalBridge)

POSITION HELD:

Software Developer and IT Support

- Python – particularly wrote scripts to import products for the mobile app more efficiently
- Helping develop an online bathroom designer
- Interviewed, hired and managed off-site 3D Artists to create 3D Assets for software
- Used prepared model/3D asset data and images, modifying and manipulating in the most proficient manner
- using Excel to match given criteria
- Completed life-like models of the clients' 3D assets for use on the client website using Blender, then categorising for others to use
- Ran standup meetings on a rotation basis to share current progress with colleagues
- Reported to seniors regularly to ensure deadlines were met
- Used Webflow.io CMS to upload models to a Demo website for clients
- Trained a colleague to support increased workload as business expanded. This included writing Standard Operating Procedure documentation

Aug 2015 – Apr 2023

DigitalBridge (Shortbite)

POSITION HELD:

IT Support

- Prepared computers for new starters using JumpCloud
